PROFESSIONAL SUMMARY

Entry-level Engineer and Information Technology student with a strong focus on cloud-native CI/CD and DevOps initiatives. Proficient in JavaScript and Python, with foundational knowledge of Linux and Shell scripting for automating build and deployment processes. Experienced in developing microservices and REST APIs, utilizing Docker for containerization and Jira for issue tracking. Committed to applying CI/CD concepts and DevOps practices to enhance software reliability and performance in fast-paced environments.

PROFESSIONAL EXPERIENCE

Full stack Developer

July 25 — Nov 25

UNIFIED CONSULTANCY SERVICES

- Engineered scalable microservices using Node.js and JavaScript for Texora.AI, resulting in a 15% improvement in system response times.
- Assisted in configuring CI/CD pipelines to automate software delivery, reducing manual deployment errors by 20% through standardized release workflows.
- Utilized Jira for issue tracking and Bitbucket for source control, collaborating with cross functional teams to ensure timely project milestones.

Web Developer

Feb 25 — Mar 25

SOFTPRO INDIA

- Executed development of responsive web applications using HTML, CSS, and Bootstrap, ensuring 100% cross-browser compatibility across major platforms.
- Documented workflows and technical guides for internal team use, improving onboarding efficiency for new trainees by 30%.
- Collaborated with team members to apply CI/CD concepts and DevOps practices during the build and release of real-time projects.

PROJECTS

Solevo

Stack: Django, REST API, MySQL, Next.js, Three.js, YAML

- Spearheaded development of a real-time solar assessment tool using Django and Next.js, securing 5th position out of 300+ teams in a regional hackathon.
- Unified microservices architecture with REST APIs and MySQL, enabling seamless 3D visualization of BIPV potential for urban buildings.
- Configured YAML files for environment setup and deployment, ensuring consistent performance across development and production stages.

Habit Tracker

Stack: React.js, JavaScript, GitHub Actions, CI/CD pipelines, VERCEL

- Launched a productivity web application using React.js, achieving a 40% increase in user consistency metrics through streak tracking features.
- Automated build and deployment processes using GitHub Actions for CI/CD pipelines, streamlining the release workflow to Vercel.
- Managed branch management and code promotions within GitHub to maintain high code quality and version control integrity.

Kakana Blast

Stack: React.js, Bootstrap, Docker, REST APIs, VERCEL

- Built a responsive food ordering platform using React.js and Bootstrap, enhancing user engagement by 25% through dynamic UI components.
- Deployed containerized applications using Docker to ensure environment parity and scalable performance across cloud-based platforms.

- Integrated REST APIs for menu management and order flow, following CI/CD best practices for rapid iteration and deployment.

SKILLS

Technical: Python, JavaScript, Linux, Shell scripting, Docker, Kubernetes, CI/CD pipelines, YAML, REST APIs, GCP, Jenkins, Jira

Soft Skills: Problem-solving, Communication

EDUCATION

B.E./B.Tech in Information Technology 2022 - 2026

Dr. APJ Abdul Kalam Technical University (Ajay Kumar Garg Engineering College, Ghaziabad, U.P.)

CERTIFICATIONS

Class XII 2020 - 2021

CBSE – D.A.V Public School Bariatu, Ranchi

Class X 2018 - 2019

CBSE – Gyan Bharti Sr. Sec. School , Tekari
